

Not available on the Mac App Store.

NEW! KID PIX 5

KID PIX 5 is the digital canvas that allows students to learn as they imagine, explore and create. Research shows, comprehension and retention are greatly enhanced when children are fully engaged. Given the ability to create using audio, video, images, animations and a wide range of paint tools, allows students to express what they have learned in a way that is truly unique to them. KID PIX encourages originality, inspires imaginations and motivates young learners.

NEW! Interactive Tappable Objects

No longer bound to a linear model, students can create interactive characters that tell their story when tapped, sing a song, play a musical note, make an odd noise, or just fly off the screen.

NEW! Collaborative Video Narration

Students can create video narrations for their stories and add animated costume frames that let them not only tell their stories on screen, but appear in them too.

NEW! Smart Navigation Stickers

A new bunch of "smart" stickers are available to help create interactive kiosk presentations. Stickers are pre-programmed with navigation actions like *forward*, *back*, *stop*, and *replay*, so that all kids need to do, is drag and drop into their projects and they just work!

NEW! Presentation Creator

Slide shows and stop-action flipbook movies can be assembled on the same screen as the paint canvas with the new Slide Tube, including setting transitions, slide duration, music tracks and how to advance to the next slide.

Layer Tools

Students will learn simple layering concepts (move to front, send to back, etc.) with the new Layer Tools in the Grab Tools area. Combined with the 3D characters and 3D backgrounds, they can now begin to explore the relationship of scale and perspective.

Multi-Level Undo and Redo

Now the Undo Guy can fix just about anything, with unlimited levels of undo and redo.

101 Movie Backgrounds!

A hundred video backgrounds provide a touch of Hollywood movie-making magic to student productions, whether they're short clips or feature length films.

NEW! Multiple Soundtracks!

Students can now assign a sound to each object (their voice, a musical instrument, or a sound effect), as well as add both narration and background music to their stories.

LEARNING BENEFITS

- Develops creative thinking, organization and presentation skills at every ability level
- Encourages integration of technology into the learning and teaching process
- Develops skills needed to meet National Education Technology Standards
- Facilitates cross-curricular learning
